The Empire's Growth

A blue book recently issued by the British Government shows the growth of the Empire in trade and population, the returns being made up to the end of 1908. Exclusive of India and the Crown Colonies, the growth of population in twenty-seven years is shown in the appended table:

	1881	1908
United Kingdom	34,884,848	45,008,421
Canada	3,745,574	6,945,000
Australia	2,250,108	4,275,306
New Zealand	489,933	972,984

In 1881 the Empire's total population was 323,694,000, and by 1901 it had increased to 385,357,000. The area of the Empire has increased to 11,334,000 square miles. The population of the British Isles is given at 342 4 per square mile; for British India 213 3; for New Zealand, 7 8; for Canada, 1 4; and for Australia, 1 3. Of the total population of the Empire about three-quarters is credited to India the population of which, including the native states, is nearly 350,000,000.

A Mighty Army of Clean Headed Canadians

Thousands and thousands of heads that were abundant fifty a year ago are scrupulously clean today.

This means that millions, yes billions, of dandruff germs have been annihilated, and cannot continue their pernicious work of hair destruction. But best of all it means that at last there is a cure, an absolute certain cure for dandruff, one so prompt in its action and so sure in its results, that many are skeptical when told of what it has done.

Parisian Sage is the name of the quick-acting hair restorer that is responsible for a mighty army of clean headed Canadians, and its action is so certain that H. W. Chambers, the agent in Didsbury, guarantees it to stop falling hair, itching scalp, and cure dandruff in two weeks, or money back.

Parisian Sage makes women's hair soft, lustrous and luxuriant in a few days. The price of this delightful money back hair dressing is only 50 cents a bottle at Chambers, Drug Store or direct, all charges prepaid by Gilmig Mfg. Co., Fort Erie, Ont.

'Weak? Tired? Run-down?'

These conditions come from overwork, a weak stomach, overtaxed nerves or feeble blood. When you feel "all in"—hardly able to drag about, no energy, no ambition, easily exhausted and can't sleep—like

BEECHAM'S PILLS

and note what a difference they make in your condition. The stomach is the first to feel the good effects. Food tastes good, the digestion is strengthened; bowels and bile work regularly, the blood is cleansed, and the nerves rested. The whole system responds to the tonic action of Beecham's Pills. Soon there is the buoyant feeling of returning health.

Fresh Strength and New Life

Prepared only by Thomas Beecham, St. Helena, Lancashire, England.

The Most Human Picture Ever Painted.

"THE DOCTOR"

The original of this painting, by Luke Fildes, hangs in the Tate Gallery, in London, placed there by popular subscription of the British people. Never has brush depicted more powerfully the expressions of professional unity, maternal grief, fatherly hopelessness or childlike helplessness. It is really as well as figuratively the most human of the world's great works of art.

A photograph reproduction of this great painting—22 x 28 inches in size—the largest photograph ever printed.

RHEUMATIC PAINS

Not Due to Cold, Wet Weather
—The Trouble is Rooted in the Blood.

Many people believe that the twinges and torments of rheumatism are due to cold, damp, or wet weather, and treat themselves by rubbing with liniments and lotions. This is a serious mistake, and one which allows the disease progress to such an extent that it is often impossible to get it out of the system. Rheumatism comes from poisonous acid in the blood, and it must be cured through the blood. All the liniments, and rubbing, and so-called electrical treatment in the world will not cure rheumatism. This is a medical truth which every sufferer from this excruciating trouble should know. Rheumatism can only be cured by driving the poisonous acid out of the blood, and enriching and purifying it. There is no medicine will do this so speedily and surely as Williams' Pink Pills. They actually make the new, rich, red blood, which drives out the poisonous acid, and makes the sufferer well and strong. It is because they do this that Dr. Williams' Pink Pills have cured thousands of cases of rheumatism after all other treatment had failed. As proof we give the case of Mrs. F. X. Boissau, St. Jerome, Que., who says: "Almost two years ago I was a terrible sufferer from rheumatism. The trouble first located in my right leg, rendering all work impossible, and walking excessively difficult. I tried to cure myself by means of all sorts of liniments and lotions, but without avail. The trouble was constantly growing worse, and the pain more and more unbearable. Finally the disease spread to my other leg, and I was all but helpless, and I was completely discouraged, thinking I would be a sufferer for the rest of my life. At this time I read an advertisement in our home paper, of this trouble being cured by Dr. Williams' Pink Pills and I decided to try them. I first got four boxes of the Pills and after using them for several weeks I could see that the painful rheumatism was gradually disappearing. I continued taking the Pills, however, until I had used about a dozen boxes, when every symptom of the trouble had disappeared, and I could do my housework without the least trouble. I have no hesitation in recommending Dr. Williams' Pink Pills to every rheumatic sufferer."

Sold by all medicine dealers or by mail at 50 cents a box, or \$5.00 for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

My dress (being a servant)—I hope you know your place?
Servant—Oh, yes, mum! The last three girls you had told me all about it.

Simple and Sure.—Dr. Thomas' Electric Oil is so simple in application that a child can understand the instruction. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young as well.

"Say, maw, does 'down to the soil' mean scrubbing a floor?"
"No. It means getting your little brother ready for Sunday school."

Minard's Liniment Cures Dandruff.

Read it black and white or forwards, the population of Cincinnati, as announced by the census bureau, is just the same, 364,463.

HELPING HUMANITY.

Father and Son Viewed Conditions From Opposite Standpoints.

Twenty years ago, says the Chicago Advance, a discouraged young doctor in a large city was visited once by his old father, who came up from a rural district to look after his boy.

"Well, son," he said, "how are you getting along?"
"I'm not getting along at all," was the disheartened reply. "I'm not doing anything!"

The old man's countenance fell, but he spoke of courage and patience and perseverance. Later in the day he went with his son to the free dispensary, where the young doctor had an unsalaried position and where he spent an hour or more every day. The father sat by, a silent but intensely interested spectator, while twenty-five poor unfortunate received help. The doctor forgot his visitor while he bent his skilled energies to the task, but hardly had the door closed on the last patient when the old man burst forth: "I thought you told me that you were not doing anything! Why, if I had helped twenty-five people in a month as much as you have in one morning I would thank God my life counted for something!"

"There isn't any money in it, though," explained the son, somewhat ashamed. "Money," the old man shouted, will accomplish nothing! What is money in comparison with being of use to your fellow men? Never mind about money. You go right along at this work of mercy. I'll go back to the farm and gladly earn money enough to support you as long as I live—yes, and sleep sound every night with the thought that I have helped you to help your fellow men."

SHREWD VICTOR HUGO.

Quiet Way in Which He Bullied the Theatrical Managers.

Here are the methods which Dumas the elder and Victor Hugo employed when they had a new play to offer to the theater. Dumas would write to the director of the Porte St. Martin: My Dear Friend—I shall bring you on Monday evening a new play, entitled *Allie, Georges, Mme. Dorval, Bocage, Lockroy, Provost and five new scenes.*

This extravagance would alarm the director, who would put off the production of the play till better days. Then Victor Hugo would appear and shily draw a manuscript out of his pocket. He would agree to everything. The stock company would play his piece admirably, since he wanted was a good one; but no new decorations would be needed nor any change at all.

So the piece would be read, and as the roles were distributed Hugo would say musically, "Dieu, how fine Frederick would be in that part!" "That is true," Horvél would murmur, and a few days after he would announce that Frederick was engaged. Hugo would then demonstrate that this destroyed the equilibrium of the cast, and in consequence the great artist, Horvél, showed reluctance at this, Hugo would threaten to withdraw his piece. And so the game would go on till, little by little, Hugo had obtained everything he wanted, even to the changing of the paper hangings in the stage boxes.

Australia's Stony Desert.

The great stony desert of north Australia was discovered by Captain Sturt, an Australian explorer, in 1844. It is north of the river Darling and is about 200 miles long and 100 broad, consisting of sandy dunes or ridges, its want of trees, except along the creeks, gives the country a sterile appearance. These ridges were probably formed by the joint effect of winds and a gradually retreating sea. According to Captain Sturt, these waters were gradually lost by evaporation or carried to some undiscovered sea. The only vegetation, growing scantily, is prickly acacias in full bloom, all of stunted growth. Water is scarce except the creeks which are sheltered, and this is generally brackish. Few travelers care to traverse this inhospitable desert.

A Quick Lie.

Presence of mind recently saved an eminent actor his gold watch and chain. While crossing a bridge in a thick night mist a suspicious looking man suddenly loomed up out of the obscurity.

"Can you tell me the time, gov'nor?" he gruffly inquired.
"You are too late, my dear sir," replied the actor suavely. "A gentleman who passed a minute ago stole my watch"—exchange.

The Aftermath.

Mrs. Denny—I was so surprised to hear that Edith and Mr. Sinsington were married. You know they always used to claim their attachment was merely platonic. Mrs. Kokrom—Yes, I remember. But now, I fear, they wouldn't claim it was even that.—Lippincott's.

REGULARITY

of the bowels is an absolute necessity for good health. Unless the waste matter from the food which collects there is got rid of at least once a day, it decays and poisons the whole body, causing biliousness, indigestion and sick headache. Rawdonville

The grade by here of the Grand
Trunk Railway is almost completed.
A pool room and barber's stand are
the latest additions.

H. F. Pieper, hardware merchant,
formerly of Sunnyslope, is erecting a
large store.
A Bank, possibly two, will com-
mence business shortly.

The crops have been very good con-
sidering the year. Spring wheat has
done well.

There is room here for a good black-
smith if one comes along.

C. Hillebrecht passed Monday en-
route for Carlton. Automobiles have
ceased to be a rare sight, but we are
still looking out for the first aviator.

Several potatoes raised within half a
mile of here were weighed the other
day and averaged over one and three-
quarter pounds each in weight.
Dave Dennett has returned from
England.

The United Farmers of Alberta here
are going strong, the meetings are en-
thusiastic and well attended.

OCTOBER
Young people, look ahead.
Really there are some things
you must know to get on in
the world. The fundamentals
for instance, Arithmetic, Pen-
manship, Correspondence, etc.
Add to these some know-
ledge of Accounts and Busi-
ness Practice and you have a
really useful education. Now
these are the very subjects we
teach and October is a good
time to start. Write
